

TAKING SHAPE

New Emergency Department promises more room for treatment

Every year, more than 40,000 patients receive their care through the Inova Mount Vernon Hospital (IMVH) Emergency Department (ED). To better meet these needs, the hospital broke ground last fall on the new Veatch Family Emergency Department.

IMVH already receives superior ED patient satisfaction scores: Nearly 97 percent of patients say they would come again for treatment if necessary. Soon, this care will be delivered in a brand new facility that matches the high quality of the service.

WHAT'S INSIDE?

The new and improved Inova Mount Vernon Emergency Department will feature nearly 19,000 square feet of treatment space, including:

- 35 larger and more private treatment rooms — 15 more than what is currently available

- Seven new “fast track” treatment rooms for less serious injuries and illnesses, resulting in faster care
- Two new rooms to manage resuscitation emergencies
- New pediatric treatment rooms with child-friendly amenities
- Improved ambulance access
- A separate, more comfortable lobby that includes a new family-friendly play area to better accommodate ED patient flow and visitors
- Ample room for future growth

Expanding the IMVH ED is about saving lives. A larger, more efficient ED means patients receive the best possible care, when every second counts.

Local entrepreneur and longtime IMVH supporter Jeffrey Veatch has committed a \$2 million lead matching gift toward the ED. As of December, about \$810,000 in donations had been raised.

Give to the Cause

Support from the community will be essential to the success of completing the new Emergency Department. To learn how you can be part of the Emergency Department expansion, including naming opportunities, contact Judy Bilicki, Executive Director, Eastern Region, Inova Health Foundation, at **703.504.7770** or **judy.bilicki@inova.org**. You can also make a gift online at **foundation.inova.org/mountvernonED**.
